

Bentley Systems 2021 Greenhouse Gas Inventory

Bentley is committed to environmental responsibility and aligning our business operations with the sustainable future our products enable. As part of our environmental policy, Bentley commits to measure and report our climate impact and to develop strategies to manage our climate impacts over time. In our second year of climate strategy, we continued to build upon our climate reporting by enhancing our scope of emissions calculations. Aligned with the GHG Protocol Corporate Accounting Standards, we assessed the 15 categories for Scope 3 emissions and aligned on eight relevant categories for our business. Working with a leading climate consultancy, we gathered activity metrics to construct our first complete Scope 3 GHG inventory. These results are detailed below and on the next page.

We also observed reductions in our direct (Scope 1 and 2) emissions compared to last year’s (2020) inventory. These reductions were consistent on both an absolute and intensity basis. Please see the following pages for our previous year data.

Equipped with a complete inventory of our corporate climate impacts, we are assessing these insights to develop a long-term climate strategy aligned with leading global commitments. We are currently assessing the feasibility of setting science-based climate targets and ways to better manage our carbon footprint. We look forward to sharing our enhanced disclosures in the future and welcome any questions or comments regarding our current climate strategy.

Scope Categories	2021	
	Absolute Emissions (tCO2e)	Emissions Intensity (tCO2e/\$M Revenue)
Scope 1 – Direct Operations Emissions	1,571	1.6
Scope 2 – Indirect Operations Emissions	3,103	3.2
Total Scope 1 & 2 (Total Direct Emissions)	4,674	4.8
Scope 3 (Value Chain Emissions)	17,965	18.6
Total	22,639	23.4

Bentley Systems 2021 Greenhouse Gas Inventory

Assessing the GHG Protocol’s 15 categories for Scope 3 emissions accounting, we identified 8 relevant categories for our business. We will continue to report on these topics annually and will assess the relevance of other categories over time.

Scope 3 Categories	2021 Scope 3 Emissions Breakdown	
	Absolute Emissions (tCO2e)	Emissions Intensity (tCO2e/\$M Revenue)
Category 1: Purchased Goods & Services	9,859	10.2
Category 2: Capital Goods	5,220	5.4
Category 3: Fuel and Energy-related Activities	1,359	1.4
Category 4: Upstream Transportation & Distribution	204	0.2
Category 5: Waste	325	0.3
Category 6: Travel	685	0.7
Category 7: Commuting	284	0.3
Category 15: Investments	29	0.03
Scope 3 Total	17,965	18.6

Bentley Systems 2019 and 2020 Direct Greenhouse Gas (GHG) Inventory

	2019		2020	
	Absolute Emissions (tCO ₂ e)	Emissions Intensity (tCO ₂ e/\$M Revenue)	Absolute Emissions (tCO ₂ e)	Emissions Intensity (tCO ₂ e/\$M Revenue)
Scope 1	1,869	2.5	2,009	2.5
Scope 2	4,104	5.6	3,701	4.6
Total Scope 1 & 2	5,937	8.1	5,719	7.1
